LIM PLAST

O nama...

LIM-PLAST d.o.o. je porodična kompanija, osnovana 1986. godine, smeštena u Kraljevu, centralna Srbija. Na početku, bila je zanatska radionica koja je proizvodila različite gumene, plastične i metalne delove, kalupe za brizganje plastike i gume, alate za štancovanje i savijanje. Ispunjavajući zahteve tržišta, počeli smo proizvodnju aparata za mužu 1993. godine.

Trenutno smo međunarodno priznata i ugledna kompanija čiji je osnovni fokus dizajniranje i proizvodnja aparata za mužu i sistema za mužu. Neprekidnim proširivanjem i usavršavanjem, postali smo kompanija koja zauzima površinu od 1500 m², nudeći raznovrsnu ponudu aparata za mužu prilagođenih različitim veličinama farmi - od malih prenosivih aparata za mužu do velikih sistema za mužu za velike mlekarske objekte, zajedno sa drugom opremom za farme.

Svojom prilagodljivošću tržištu, obezbeđujemo visoku pouzdanost i kvalitet, proizvodeći 80% komponenti naših uređaja. Sa dugogodišnjim posvećenjem kvalitetu, prisutni smo na tržištima Makedonije, Bosne i Hercegovine, Crne Gore i Slovenije. Fokusirani smo na dugoročni i održivi razvoj našeg preduzeća.

U svakoj kapljici mleka leži snaga naše profesionalne posvećenosti i napornog rada.

About us

LIM-PLAST d.o.o. is a family company, established in 1986, settled in Kraljevo, central Serbia. In the beginning, it was a handicraft workshop which manufactured various rubber, plastic and metal parts, plastic and rubber injection molds, die and bending tools. Meeting the market requirements, we started manufacturing milking machines in 1993.

At the present time, we are internationally acclaimed and reputable company which primary focus lies in the design and manufacturing milking machines and milking systems. Through continuous expansion and refinement, we have evolved into a company occupying a 1500 m² facility, offering a diverse range of milking machines tailored to various farm sizes - from small portable milking machines to large milking systems for big dairy facilities, along with other farm equipment.

With our market responsiveness, we ensure high reliability and quality, manufacturing 80% of the components of our devices. With a long-standing commitment to quality, we have established a presence in the markets of Macedonia, Bosnia and Herzegovina, Montenegro, and Slovenia. We are focused on the long-term and sustainable development of our enterprise.

In every drop of milk lies the strength of our professional dedication and hard work.
